

Morethanpolish become the newest Zymol Authorised Reseller

Since 2003 Morethanpolish Ltd has supplied owners of sports, classic, modern and luxury cars with sound advice and fine products. Now Morethanpolish.com can supply owners with the ultimate – Zymol handcrafted waxes, cleaning and protection products. Zymol is accepted as the best by the owners of the most loved cars in the world.

As a leading Swissol/Swissvax distributor since 2003, Morethanpolish resigned their distributorship on 7 December 2007 due to changes in operational and commercial arrangements imposed by the UK Swissvax Importer. At this point Morethanpolish was delighted to take the logical step of advising its customers to switch with us to Zymol, the undisputed market leader.

Morethanpolish MD, Mark Wibberley commented: 'Zymol has always had a clear vision and is a truly partnership-focussed company. Over the past couple of years during conversations with Charles Bennett, founder and CEO of the Connecticut based Zymol Inc, I recognised that Zymol is led by a serious car enthusiast and as such has similar values to my own company, Morethanpolish.

'Morethanpolish is an advice driven company, not a 'car care supermarket', so we like to spend time talking to customers about their cars and advise on the most suitable products. We attend over twenty car shows and club meets a year and have thousands of customers, especially owners of sports and prestige marques, such as Porsche, Ferrari, Aston Martin, Bentley and Rolls Royce, who provide us with positive feedback about our service on a daily basis.'

Zymol products are well proven and need no introduction to serious connoisseurs. Products include car shampoos to preserve the natural oils in your paint preventing oxidation and dulling, cleansers to remove embedded dirt and road film, carnauba waxes to protect your paint and everything you need to maintain the exterior and interior of your special car. The full range of Zymol products are now in stock and orders are being taken for next day delivery
